# WEKA: The bird

**Weka is a bird found only on the islands of New Zealand.**

*Copyright: Martin Kramer (mkramer@wxs.nl)*

# WEKA: Introduction

- A collection of open source DM/ML algorithms (pre-processing, classifiers, clustering, association rule).
- Created by researchers at the University of Waikato in New Zealand
- Weka is open source software in JAVA issued under the GNU License.
- Download software from  
<http://www.cs.waikato.ac.nz/ml/weka/>

# Main Features

- 49 data preprocessing tools
- 76 classification/regression algorithms
- 8 clustering algorithms
- 3 algorithms for finding association rules
- 15 attribute/subset evaluators + 10 search algorithms for feature selection

# WEKA:: ARRF file format

Attribute-Relation File Format (ARFF): **Header** section and **Data** section

```
@relation heart-disease-simplified  
@attribute age numeric  
@attribute sex { female, male }  
@attribute chest_pain_type { typ_angina, asympt, non_anginal, atyp_angina }  
@attribute cholesterol numeric  
@attribute exercise_induced_angina { no, yes }  
@attribute class { present, not_present }  
  
@data  
63,male,typ_angina,233,no,not_present  
67,male,asympt,286,yes,present  
67,male,asympt,229,yes,present  
38,female,non_anginal,?,no,not_present  
...
```

relation name

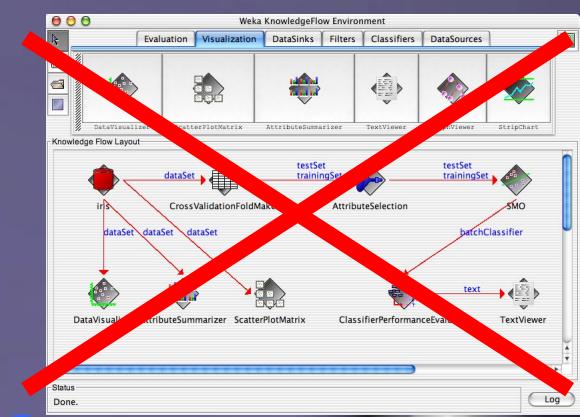

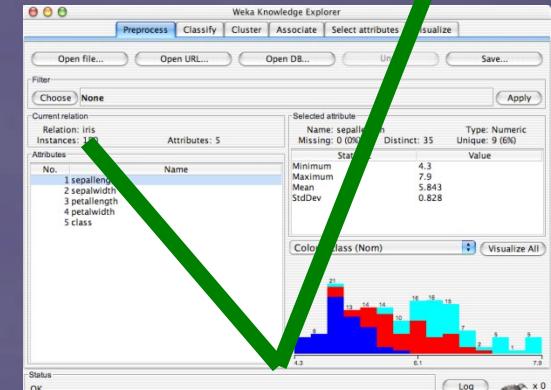

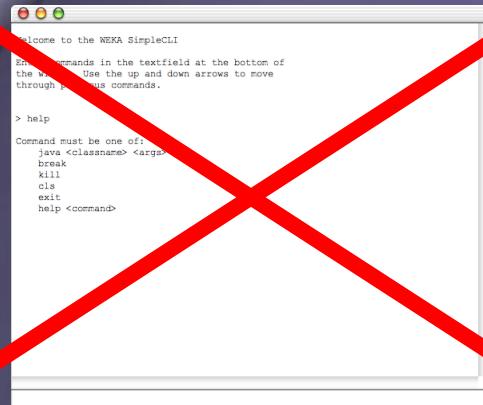

numeric attribute

nominal attribute

data

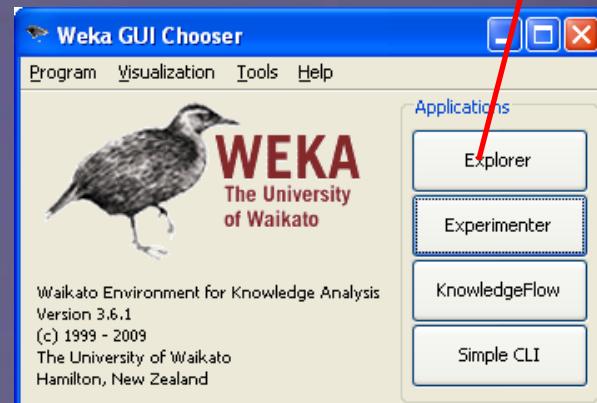

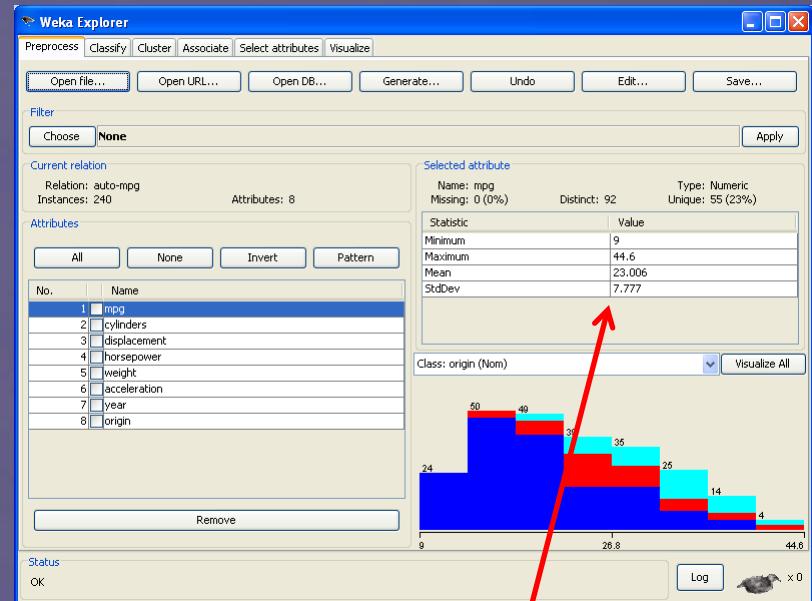

A more thorough description is available here  
<http://www.cs.waikato.ac.nz/~ml/weka/arff.html>

# WEKA: Interface

# Explorer Interface

- Explorer
  - pre-processing the data
  - building “classifiers”
  - clustering data
  - finding associations
  - attribute selection
  - data visualization

# Limitations of WEKA

- Traditional algorithms need to have all data in main memory
- ==> big datasets are an issue
- Solution:
  - Incremental schemes
  - Stream algorithms

MOA “**M**assive **O**nline **A**nalysis”

(not only a *flightless* bird, but also *extinct!*)
