Weka: Association

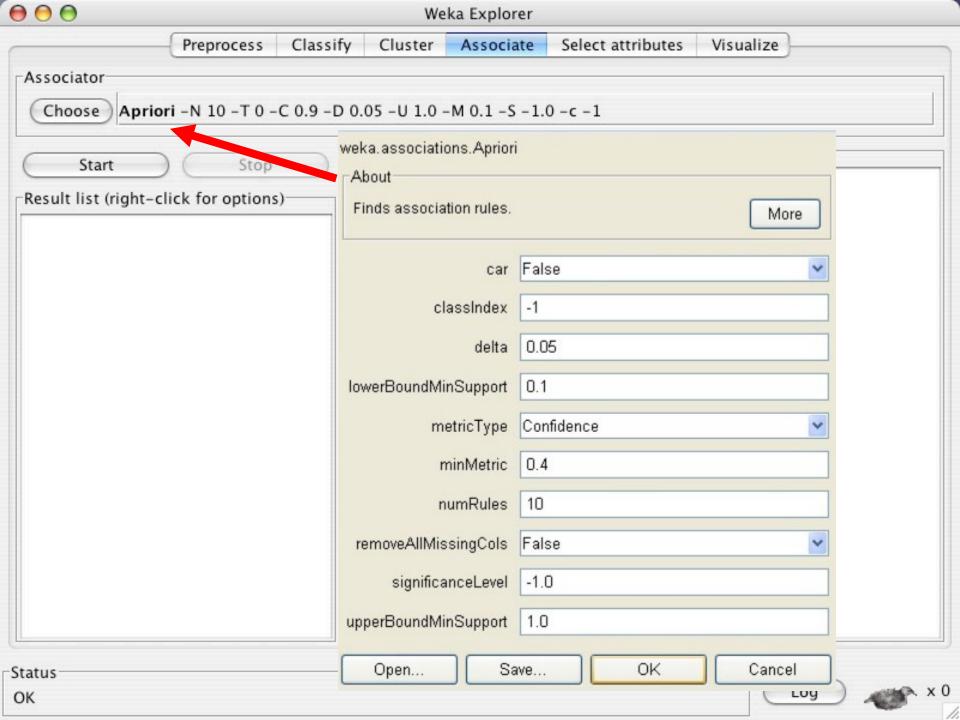

Cristóbal Romero,

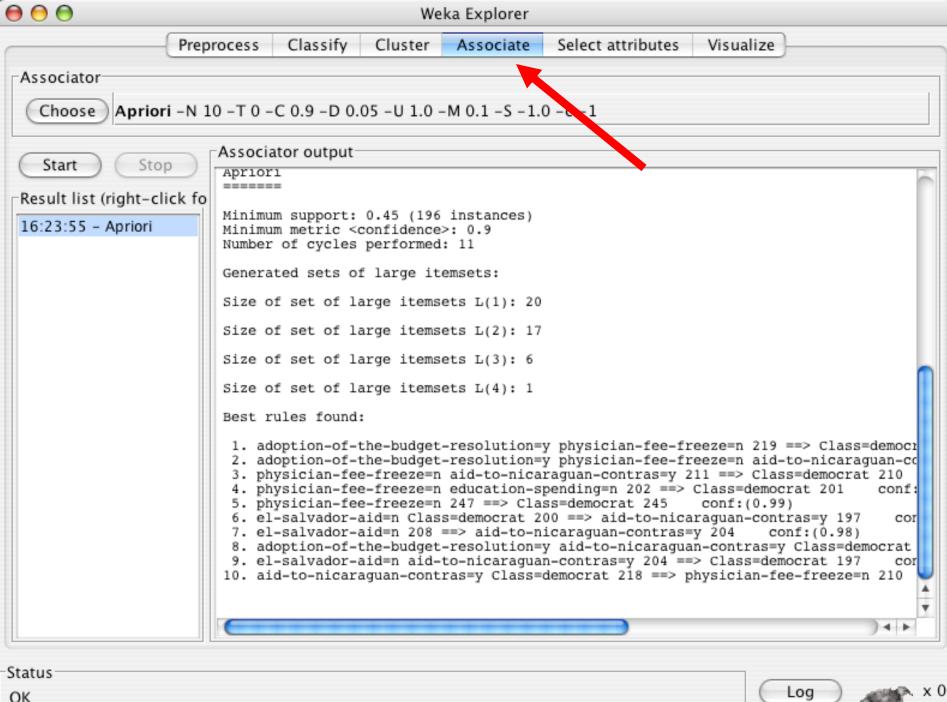

Córdoba University, Campus Universitario de Rabanales, 14071, Córdoba, Spain cromero@uco.es,

Weka: finding associations

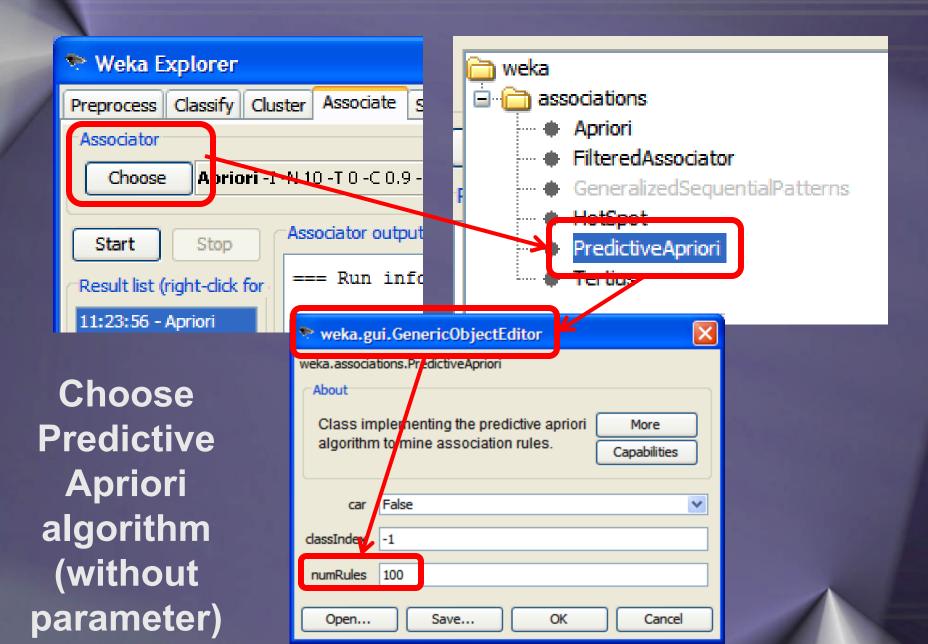

- WEKA contains the several algorithms for learning association rules
 - Works only with discrete data
- Can identify statistical dependencies between groups of attributes:
 - milk, butter ⇒ bread, eggs (with confidence 0.9 and support 2000)
- Apriori algorithm (most popular) can compute all rules that have a given minimum support and exceed a given confidence

Occurrences of Outlook = overcast

Support for Outlook = overcast AND Play = yes

Associator output

```
    Outlook=overcast 4 ==> Play=yes 4
