Part B. CV SUMMARY (max. 5000 characters, including spaces)

Associate Professor at the Universidad de Córdoba, with **13 years' of postdoctoral experience in consumer behaviour in agri-food markets**. She got a PhD scholarship (Formación de Personal Investigador) in the IFAPA Research Centre (Instituto de Investigación y Formación Agraria y Pesquera-Granada) and made a four months' stay in the Scottish Agricultural College in Edinburgh. She won both the Consejo Económico y Social de Andalucía Award for her doctoral Thesis about citizens' preferences regarding agri-food policies and twice the Unicaja Agricultural Research Award in the year 2010 and 2011. In the same year, her post-doctoral contract with IFAPA finished and she got a position in a private university (Universidad Loyola de Andalucía-Sevilla). She was working at the Universidad Loyola Andalucía until Abril of 2019 from junior lecturer to associate professor position. In that period, Melania Salazar-Ordóñez received a strong formation and experience in teaching (with more 2.100 hours of university teaching), and she struggled to continue researching. It is worth mentioning she obtained two research Sexenios (from 2006 to 2013 and 2014 to 2019) and she was invited three times in different research stays to Twente University (Holland) for a total of 5 months, publishing two papers. Consequently, from the year 2011, **over 22 publications in peer-reviewed journals indexed in the JCR has been published** (18 in Q1 and Q2 - no

one in MDPI journals and all of them, except for two, in open access). In addition, she has had an important **international activity by means of intensive collaborations with Asia (Bangladesh and Cambodia) and Latin América (Honduras)**. Her participation in four international researches as a main researcher within the leading team, where she collaborated hand by hand with local actors, has allowed her to develop the necessary skills to manage difficult situations related to the coordination of different partners, training of researchers and surveyors, designing questionnaires for illiterate people, getting to rural citizens in developing countries, etc. It is notable that she participated in the performance of the first census made in the rural area of South Kosbash (Bangladesh), where she was training some lecturers of the Bangladesh Academy for Rural Development and performing interviews with rural women who actually had not recognize any rights. When Melania Salazar-Ordóñez changed her position to the Universidad de Córdoba in the year 2019, she was incorporated in the WEARE Research Group where she has been intensively collaborating as it is shown by the six publication indexed in JCR published in 2021, and she has gotten a **coordinated project and an individual project as a main researcher** of the Universidad de Córdoba partner to analyse, in the former, consumer behaviour regarding agri-food products made by goat milk, which has been feeding with byproducts derived from olive oil production process, in a circular economy subject, and, in the latter, the sustainability reporting from agri-food companies.
